# Nexus

Starting with the intuitive and ultra-portable Tablet whiteboards, you can coordinate your thoughts, interact with others, contribute to the discussion and communicate with the team. Working the way you want, via design features that connect Nexus products together, to create flexible “we” spaces that enable both informal discussions and larger group presentations. From here, the sky’s the limit for the possible interactive opportunities and collaborative workspaces available with Nexus.

The Tablet (pictured above) is the mobile cornerstone of the Nexus Family

## Focus the Conversation

“You cannot really appreciate the power and magic of Nexus until you use it. It’s not just one thing; it’s everything about it. The two distinct surface areas help separate ideas or discussion topics, whether it be strategic and tactical, or a visual and task lists. I call the tablet my ‘laptop’ — I can sit down with a client and collaborate or share a concept together, then hang it up and use it as a reference when we work on the adjoining big board. All I can say is that this system just flat-out invites collaboration and engagement like no traditional whiteboard or flip chart ever could.”

- **Innovation** – Silhouette’s design features are based on extensive customer research with users of traditional enclosed boards. Its size was specifically chosen to allow for nine letter-sized sheets of paper
  - **Full View** – unframed tempered glass door and minimal sides allow for full viewing of what is on display
  - **Flexibility** – no designated top or bottom permits the user to mount Silhouette so the hinged door opens either to the left or right
  - **Configurable** – Silhouette’s modular design allows the freedom to use one or multiple units side-by-side
